

TODO ASSIGNMENT

Create a control that allows users to create a TODO list. The user can

- Add an item (clicking enter adds a new item)
- Edit an item (double clicking an existing edit)
- Mark an item complete

You can use the internet for help and whatever libraries you like. Store the results in localStorage.

	What needs to be done?	
<input type="checkbox"/>	Pick up the groceries	today 1:38p
<input type="checkbox"/>	Mow the lawn	today 1:30p
<input type="checkbox"/>	Turn in office paper about Benfits of Javascript	yesterday 1:30p
		Completed

Double-click to edit a todo
